Keep an eye out for your place and view videos from multiple cameras at the same time Last update on 09/29/19 There's been 1 update in the last 6 months The current version has 1 flag on VirusTotal show reviews If you have an Android smartphone and want to enjoy the benefits of mobile security camera monitoring, you've come to the right place. Many of today's most trusted manufacturers of IP security cameras, NVR and video management software offer applications for Android IP cameras for safe and reliable monitoring. VideoSurveillance.com provided a list of Android security apps offered by manufacturers and high-quality features available on each of them. Optica Android Security Camera App Name: OpticaMobile Optica, a leading manufacturer of high-definition IP cameras, offers Mobile Apps OpticaMobile and OpticaMobile HD for iPhone, iPad and Android devices. OpticaMobile provides a wide range of features to improve viewing for all Optica IP cameras, including four-time viewing mode, live video streams, bookmarks, audio, images, dual flow support and P218 optica control. It's an easy and convenient way to connect to your optica IP camera system while on the go. OpticaMobile HD is built for use on iPad, while OpticaMobile is compatible with iPhone and Android devices. Milestone Android IP Camera App Title: XProtect Mobile Created by Milestone, one of the world's leading video management software developers, the XProtect Mobile Android Security app offers a variety of features served by on-the-go surveillance users. With an average rating of 4.6, with 5 being the highest score, users raved about its built-in features and usability. What is great about this CCTV app, how many cameras you will be able to view and control at the same time. Users were most excited about the number of cameras they could monitor on this app - one even wrote that the app was able to support all 38 of the user's IP cameras. Key features include video push, entry and exit control, PPP camera control, live video feed viewing with numerous remote security cameras, photo sharing to send via email or MMS, and compatibility with WiFi, 3G and 4G networks. Smartvue Android IP Camera App Title: Smartvue Android App Smartvue has remained on the advanced NVR technology since its inception. Recognized as an innovator in this market, Smartvue offers free remote access to video surveillance in its NVR, so you can check your IP cameras while on the go. Designed for Android version 2.2 and up, the Smartvue Android App gives you full access to your IP camera system when you're physically off the site. With the Smartvue Android app, you can view live video feed, playback Recordings, swipes on the screen to change the camera, control display settings as needed, monitor multiple cameras at once, and monitor PPP functions. It also works with a wide range of IP camera brands and body styles. Users gave The CCTV app has excellent ratings for its convenience, ease of use, and intuitively designed interface. Vivotek Android IP Camera App Title: Viewer LITE Is an Android IP camera viewing app offered by Vivotek allowing surveillance users to monitor live video from all their IP cameras, or those that are controlled by vivotek video management software for up to 360 seconds at a time. Please note that this app currently only works with Android V2.3 and above. Supporting IP cameras from a variety of server connections, this app allows you to control PPP through touch screen, real-time video switching for various display options, image shots, single-channel surf playback, and the ability to play recorded video for 1, 2, 5 and 10 minute intervals Also, you can customize the app to support fish-eye camera views. The name of the Android IP camera app: VMobile, offered by the manufacturer NVR, VMobile Android App facilitates remote and wireless monitoring of IP cameras by connecting to the company's VioStar NVR via Android versions v1.6, v2.1 and v2.2. VMobile is able to manage an unlimited number of servers and cameras for a wide range of brands of IP cameras and body styles. With this app, you'll be able to set up display mode, manage PPPs, receive notifications if your IP camera detects tampering or vandalism, and capture the images you want to save. You can also play recorded videos from each of your IP cameras and search for recorded video depending on date and time. Everfocus Android IP Camera App Title: MobileFocus s MobileFocusPlus via mobileFocus Android security camera app, you can connect to Everfocus DVRs and IP cameras at the touch of a button. Everfocus is one of the leading manufacturers of CCTV cameras, DVRs and professional security products, including the select line of IP cameras serviced by the ever-growing IP surveillance market. The simplest features of the mobile monitoring app are real-time viewing of cameras and managing models of remote PPP security cameras. Mobile monitoring support technologies include device management, channel management, digital gesture zoom, image capture and full screen mode. Wi-Fi cameras are inexpensive and easy to set up. This makes them ideal for home security. At a very low price, you can lay out Wi-Fi cameras all over the house. They can help you keep an eye on your baby's room, make sure your basement doesn't flood with water, or keep an eye on your entryway when you hear a strange noise in the middle of the night. Most Wi-Fi cameras on the market are pretty much plug-in and play. All you have to do is find software that will help you all of them at once. Below are 8 best free Wi-Fi camera apps to monitor all wireless home security cameras right away on windows. The best free Wi-Fi camera apps for Windows SystemsWrite for us: Competitive Payment. Familiar with smart home automation, media streaming, HTPC, and home server Tinkers and amateurs preferred. No experience is required. APPLY HERE. We have previous covers of the best wireless outdoor security cameras and the best security cameras for Samsung SmartThings. In this post, let's see some of the best Wi-Fi camera software, so you keep an eye on things from your computer.1. XeomaXeoma Free IP Camera AppThis free ip camera monitoring software is one of the easiest applications to customize. All you have to do is make sure that your IP cameras are all connected to the same network with a dedicated IP address. Xeoma includes a scanning feature that will search all connected IP addresses on your network to automatically identify the attached Wi-Fi cameras. Once all the cameras are identified, the app will display them all in the grid. In this app, you'll get all the following features: Set up automated activities such as detected recording movements and alerts. Manual recording of any camera when you like. Take a screenshot of any camera. Keep the app open to keep an eye on all the cameras at the same time. Xeoma Lite is a free version and allows you to control up to 4 IP cameras at a time. The upgrade isn't inexpensive, but the Standard Edition will allow you to control up to 3,000 IP cameras, and the Pro version has its own dedicated cloud service. Download Xeoma Camera Software2. The ViewerIP ViewerIP camera ViewerThis Wi-Fi camera app does exactly what its name says. The free version is strictly for viewing IP cameras on your network. Set up 4 Wi-Fi cameras in your home and add them to this app to view them on the screen at any time. Setting up the cameras in the app is very simple. Click the Add Camera icon. Choose whether it's an IP camera or a USB connected webcam. Enter the IP address and Wi-Fi camera port number. Give a secure ID and password if your camera has it. Choose the brand and model of your camera. Tap Test Connection if you want to make sure your settings work first. Click OK to add the camera to the main screen. That's all there is to it. If you want advanced features such as motion detection and alerts, you need to switch to Security Monitor Pro for costs. Download the Viewer3 IP camera. iVideoniVideon IP Cam AppThis is a unique IP camera viewing app in that it does not provide a localized monitoring system for the surveillance you work on your local computer. Instead, you run an iVideon server on your laptop that collects all video streams from all over your home and sends them over the Internet to your iVideon cloud account. This allows you to access video feeds from anywhere in the world at all, as long as you have access to the Internet. The server is very easy to set up and automatically detects all the devices connected to the network, the server can collect video or audio channels. In a cloud account, you can set up all the following for each camera. Motion Detection Event NotificationsReal-time video channel displayThe iVideon software and cloud account is free. The company offers it in the hope of hope You will buy their IP cameras. Download iVideon4. Anycam.ioAnyCam IP camera Viewer This IP camera viewer is one of the most impressive free Wi-Fi camera applications. Instead of guessing Wi-Fi camera settings such as a port number or brand, it scans the correct port and easily connects to the camera. You only need to know the IP address of the camera, and any login details if necessary. Features included in the Anycam.io include: Real-time videotaping real-time Videota video-fixing Cloud streaming (with capable cameras) Running automatically when Windows startsCapture screenshotsFree version Anycam.io allows you to connect with only one Wi-Fi camera at a time. However, for an affordable fee, the software update allows you to connect to multiple cameras at the same time. Download Anycam.io5. The ideal IP camera ViewerPerfect IP Camera ViewerThis IP camera app and allows you to add up to 64 cameras that you can display on the home screen in different layouts. Adding new cameras is easy just with an IP camera address. You can initiate motion detection monitoring on any of the cameras. You can also initiate the recording as well. The camera channels updates in real time and works with a wide range of Wi-Fi camera models. Download The Perfect IP Camera Viewer6. ContaCamContaCam Free Camera View AppThis is one of the few Wi-Fi IP camera viewers that is really free, not just a trial. However, it is a little harder to connect with Wi-Fi cameras on the network. There is no automatic scanning function. You will need to know not only the IP and port number, but also the type of camera and the format of the video channel. If you can get the settings right, the camera viewing app offers many useful features. Connect either an IP camera or an integrated, USB-connected CameraTake snapshot of any of the connected camerasNets automated log from your Wi-FiRun cameras browsing as a service and launch when Windows bootsSet up to view the software as a built-in web serverManually record any of the camera feedsJust keep in mind that the Installation Of ContaCam sets it up to run every time you start Windows.Download ContaTa. Security EyeSecurity Eye Camera Viewer When you first launch Security Eye, it will scan your network for any local Wi-Fi cameras you've created. If it doesn't identify any cameras, you can set up the cameras at their IP address. The setup is very simple and works with a long list of popular camera brands. Features of this app include: Active camera monitoring and camera alert recordingsPan, tilt, or zoom video streamsChange layout to display multiple cameras The app includes a guide that can help with connecting to cameras and setting up the app. Download SecurityEye8. AgentAgent Camera ViewerAgent is an IP camera app that makes connecting to any Wi-Fi camera on your network extremely easy. The master-mounted camera app will scan the entire network and list all available Wi-Fi cameras. It's one of the few Windows apps capable of almost any brand of camera. The agent works on your computer as a server and you can access your free cloud account to run the master connection and view all the live channels. Once the app finds your cameras, just go back to the main window and click on Live to see all the channels. If the app can't connect to any of the cameras, you'll see a connection error icon. Just click and edit the settings to connect. Agent Features: Access to your Wi-Fi camera channels from anywhere in the world with Internet access. Connect any camera from multiple locations to one online cloud account. Set up traffic detection areas for the video stream. Set up traffic alerts and notifications. Take pictures from any camera. Record a video stream from any camera. Download AgentUsing Wi-Fi Camera Spectator AppAs you can see, there are many free options for setting up your own home surveillance network using only inexpensive Wi-Fi cameras and any of these free desktop camera viewing apps. Each of these Windows apps offers pros and cons. Some of them have limits on the number of cameras you can connect to. The app you choose really depends on how you plan to use the video streams. Try a few of these apps and see which one works best for you. Once you choose one, you will have a useful, inexpensive home security system that will keep your home and everything inside it safe.
